Auxiliary Code Breakdown

K-5
 └─ Designates the year. "K" indicates the year 2000. Years progress or regress in alphabetical order. "J" is 1999, "L" is 2001, "M" is 2002, and so on. The letters "I" and "O" were skipped.
 └─ Designates significant part changes within the same year for this model. Base is 5 (0 for auxiliary codes J and K) and this number advances for each change.

Example: P-6
 └─ "P" indicates 2004.
 └─ "6" indicates the first significant part change for 2004.

This diagram illustrates the assembly of a mechanical unit, likely a pump or motor. The main components are labeled with numbers and letters in circles. The assembly includes a base (1), a motor (7), a pump head (8), and various mounting brackets and fasteners. Two inset boxes provide detailed views of specific sub-assemblies: one for components J-0 to Q-5 and another for components 17 and 18. The diagram shows the relative positions and assembly sequence of the parts.

Key components and callouts include:

- 1**: Main base plate
- 1a, 1b, 1c**: Fasteners for the base plate
- 1d, 1e**: Fasteners for the motor mounting

Note for Models Having Serial Number M5 and Earlier

If your model falls into this time frame and you need to replace parts in the assembly, review the scenarios below and follow the appropriate solution.

- a. Unit's evaporator shroud has only two holes or has four holes but only the lower two holes are threaded.

Solution: Order HS-3541 that contains a motor (Shinko), brackets, blade, and all fasteners required for mounting to the shroud using the existing threaded holes.

- b. Unit's evaporator shroud has four threaded holes and a Jakel motor.

Solution: Order a new motor (Shinko), brackets, fan blade, and all fasteners listed in the parts list above. Attach the brackets to the upper two holes on the shroud.
