

CME1356R and CME1656R Service Parts

This parts list contains the part numbers and description of the replacement parts available for these two models.

They have been manufactured in both 50 and 60 Hz, plus there have been model series changes from A, to C to D plus F and H.

To avoid costly and time consuming errors, double check the model and voltage before ordering a part.

SERVICE BULLETIN

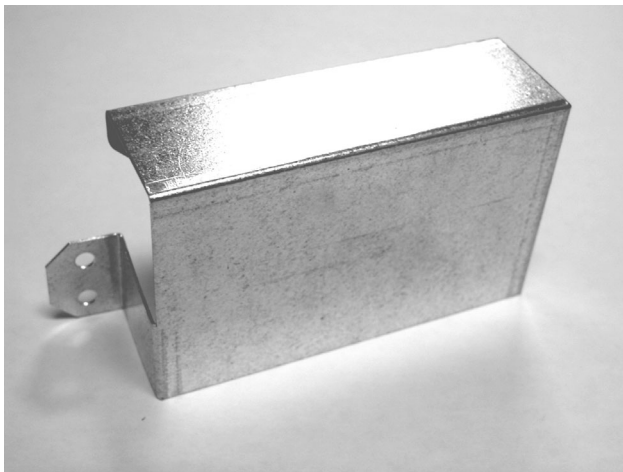

Subject: Controller Cover

Affects all versions of models: CME1356, CME1656, CME1856 and CME2006

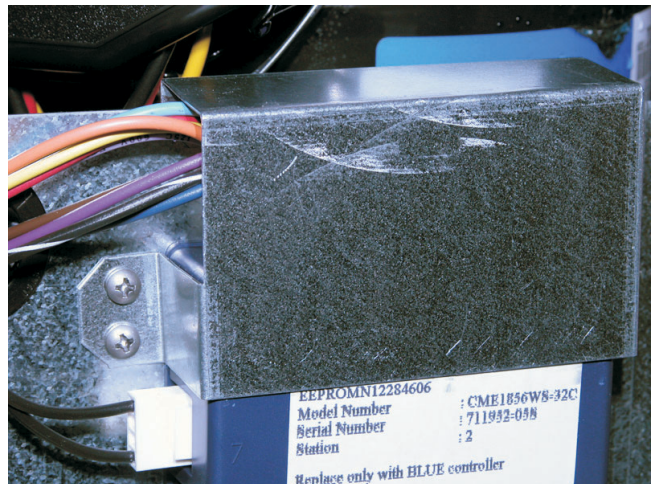

The above models are now manufactured with a sheet metal cover over the top of the controller.

Service controllers also are now shipped with a cover that should be applied to these models whenever replacing the controller if the machine does not already have a cover installed.

Whenever cleaning or servicing any unit, check to see whether it has a cover over the controller like the one shown below. If it does not, Scotsman recommends installing a cover. A separate part is now available for this purpose. Its part number is **A37480-021**. It mounts over the top end of the controller and is secured by two sheet metal screws. Use the cover as a template and drill two 1/8" holes for the two screws.

Controller Cover

Cover Installed on Unit

Scotsman is shipping a supply of covers to all Scotsman Distributors and listed service agencies. A supply of covers should be carried by each service person on service calls so a cover may be installed on the unit being cleaned or serviced if one is not already in place. Additional covers may be obtained free of charge from Scotsman, through the local Scotsman Distributor, as needed.
