Auxiliary Codes

KMS-1401MLH	U-0	November 2009
	V-0	February 2010
	V-1	March 2010
	A-0	January 2011
	A-1	March 2011

Auxiliary Code Breakdown

The auxiliary code is the first two characters in the serial number. The first character indicates the year. Years progress or regress in alphabetical order. The series runs from "A" through "V" and the letters "I" and "O" are skipped. The second character indicates significant part changes within a year. Base is "0" and this number advances for each change. In cases where there is a letter in parentheses, this designates the month. This is the last character in the serial number. The series runs from "(A)" through "(M)" and the letter "(I)" is skipped. This designation is only included when identifying a parts change within an auxiliary code.

Note About Ordering Parts

Most assemblies cannot be ordered as complete units; parts in the assemblies generally must be ordered separately.

U-0 to A-1

Title: A. Ice Cuber Assembly and Refrigeration Circuit Model: KMS-1401MLH												
Index No.	Description	Material or Model Number	Part Number	Required Number
